

SSB Static Nozzle

Static nozzles such as the SSB are widely employed in the food and beverage industry, used for cleaning vessels containing milk, wine and other liquids. They are also used in the chemical and pharmaceutical industry.

Operation

Can be used horizontally or vertically from any direction.

Can clean tanks and vessels without the need for chemical solutions, just hot water.

No moving parts means minimum wear and subsequent maintenance.

Specification

360° spray coverage.

Operating pressure: 1 bar

Radius of spray from 1 metre to 7 metres.

Flow capacity from 1.2 m³/hr to 30 m³/hr.

Construction

Constructed entirely from SS316.

Model	Flow Rate ltrs/min @ bar					
	1	2	3	4	5	6
SSB	16.1	20.1	24	26	28	30
