

DG

- Tungsten Carbide Full Stream Nozzle

The DG nozzle produces a full stream 0° spray pattern with high concentration and high impact, making ideal for cutting and drilling heads.

It has a tungsten carbide orifice for excellent longevity and is designed for pressures up to 500 bar.

Tips are available in 7mm, 10mm, 12mm, and 14mm.

Construction

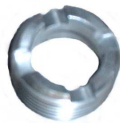

Constructed from tungsten carbide (tip) and SS303 (adaptor & retaining holder).

Adaptor

Tungsten carbide tip

Retaining holder

The Tungsten carbide tip push fits into the retaining holder.

The retaining holder, with a 1" UNS thread, may be screwed directly into a drilling head, pipe or adaptor.
