

# PAJ SPRAY NOZZLES

PAJ nozzles offer up to 20% more impact than other high pressure flat spray nozzles.

The uniquely designed rectangular orifice creates larger free passage compared with other nozzles with similar flow characteristics. This results in fewer blockages, especially when using recycled water.

The nozzles are quick and easy to install with line-up markings for accurate location and alignment.

## Construction

Constructed from SS303 (other materials available on request).

Ref	Body size	FLOW RATES Ltrs/min @ 3 bar	NOMINAL SPRAY ANGLES @ 3.0 Bar. G
PAJ 20	1/4"	3.92	0° 30° 40° 50°
PAJ 25	1/4"	5.81	0° 30° 40° 50°
PAJ 30	1/4"	7.32	0° 30° 40° 50°
PAJ 40	1/4"	11.39	0° 30° 40° 50°
