

TANKO® RB90

The TANKO® RB family unites the well-known features of a static spray ball with the advantages of a rotating system. The RB90 part of this TANKO® family is a media driven rotating spray head.

Owing to the spray ball rotation, large quantities of cleansing agent are spread homogeneously onto the inner surface of your vessels/ barrels in the shortest time. The results are a considerable reduction of cleansing agent consumption and cleaning time. Even in the unlikely case of a failure to the rotating system, the spray head acts a static spray ball.
